AI Generalist | Founder's Office | Builds AI agents with Claude

Summary

I build small AI tools that save a founder hours each week: Claude agents for outreach, research and reporting. I ship fast, measure what happens and write it up plainly.

Projects and experience

Outreach agent, Example Studio — Jun 2026 to present

- Built a Claude agent that drafts personal cold emails from a website audit, 120 drafts a week.
- Wrote the checks that block hype words and missing opt-out lines before anything is sent.

Founder's office intern, Example Foods — Jan 2026 to May 2026

- Ran weekly sales reporting in Google Sheets for 3 product lines.
- Shipped a pricing calculator that the sales team used on every quote.
- Sold 40 orders at a pop-up stall over two weekends.

Open-source Claude skills, personal project — 2025 to present

- Published 6 free Claude skills on GitHub, each with a README, tests and an example.

Skills

AI: Claude, prompting, agents, automation · **Build:** Python, HTML/CSS · **Growth:** content, outreach, D2C

Education

B.Com, Example University — 2022 to 2025
